2019 Vine Street Improvements Project Weekly Project Update

June 7, 2019

The City of Hudson is currently reconstructing Vine Street from 9th Street to Wisconsin Street. The duration of the project is May 6, 2019 to the substantial completion date of September 30, 2019. Construction includes pavement and curb removals, sanitary replacement, water main replacement, minor storm sewer, curb replacement, pedestrian ramps, asphalt replacement, median reconfiguration and restoration.

Work Completed for the Week of June 3

A-1 Excavating connected their sanitary sewer to the existing line near Twelve Oaks Lane. The crew also connected onto the water main at 11th Street and ran their water main to 12th Street, just short of their connection. The end of the week was spent testing the new utilities and installing services to the homes along Vine Street.

Work Scheduled for the Week of June 10

A-1 Excavating is planning to connect their water main to 12th Street on Monday which will result in several homes being without water during the day. All homes affected received a notice of interruption. The crew will also set up their temporary water supply for the work on the alley south of 10th Street in order to begin the sanitary sewer and water main installation later in the week. The end of the week is anticipated to include connection to the water and sanitary sewer across from 12th Street.

Traffic Impacts

Vine Street will be shut down throughout the duration of construction. All access to homes off Vine Street will always be available from 7:00pm to 7:00am, except during concrete curb and driveway curing time. The currently schedule to reconstruct from 9th Street to 12th Street from May until mid-June and then start on reconstructing from 12th Street to Wisconsin Street. Whenever the crews are not working in front of your property, access will still be available to your driveways. Please refer to the notices that will be delivered or call the City Project Manager for any access questions or concerns. There will be a detour set up on Monday for though traffic.

Other Notes

If you have any additional questions or concerns please contact the project hotline at **(715) 531-2786**.
