Building Permit
Inspection Scheduling
(715)716-5722

March 19, 2020

Building Department Notice:

Effective immediately, the City of Hudson Building Department is suspending all building inspections. This measure is to help ensure the safety of our community and City inspectors. Please monitor the City of Hudson website at www.hudsonwi.gov for updates. Questions can be directed to 715-386-4775.

- *Approved building permits have the right to proceed without inspection, but not having an inspection does not eliminate the approved permit holder's responsibility of being code compliant. If there is any question of whether an activity is code compliant, it is highly recommended to stop work until an inspection can occur.*
- *Inspections. Continue to request inspections as you normally would so that we can perform the necessary inspections as soon as possible after the ban is lifted.*
- *Pictures. Approved permit holders can take pictures for their own documentation; however, the City will not pass an inspection with pictures alone.*
- *Permit applications can still be made via email, US mail, fax, etc. The City cannot guarantee a timeline for review and approval. No project can proceed without first obtaining a permit.*
- *Permit reviews and processing will occur as quickly as possible and the City will notify applicants of their permit fees. Permit fees will need to be mailed in or may be dropped in the water utility box. Upon receipt of payment, the applicant can proceed and the City will email a copy of the permit for the applicants records.*
- *The duration of this stoppage is uncertain. The City of Hudson will keep you advised of changes as soon as possible. Monitor the City of Hudson website at www.hudsonwi.gov for updates.*
